

Dedicated Cybersecurity Expert specializing in-safeguarding applications and online platforms. Leveraging extensive experience in VulnerabilityAssessment, PenetrationTesting, DevSecOps, ThreatModeling, and Incident Response to enhance cybersecurity measures and protect digital environments.

Education

Aug 2023 – Present
B.Tech – CSE (IoT)
GITA Autonomous College,
Bhubaneswar
CGPA: 7.4

Ongoing (1.5 Years)
Adv. Diploma in Cybersecurity
Indian School of Ethical Hacking
(ISOEH), Bhubaneswar

Technical Skills

Tools:
Burp Suite Pro, Nmap, Nessus, Metasploit,
Nuclei, Mimikatz, Wireshark,
Splunk/ELK, ZAP, Subfinder
Languages:
Python (Automation), Bash, Java, SQL,
PHP
OS:
Kali Linux, Parrot OS, Ubuntu, Windows
Server
Cloud & Others:
AWS (Basic), Docker, VirtualBox, VMware
Others:
Bug Bounty, CTF Competitions

Core Competencies

- Vulnerability Assessment & Penetration Testing
- API & Web App Security
- Incident Response
- AI AND LLM TESTING
- Security Compliance
- Security Automation
- Risk Management

Certifications

Certified Network Security
Professional (CNSP), SecOps Group,
2026
Certified Security Engineering &
Defensive Professional (CSEDP),
SecOps Group, 2026
Advanced Diploma in Cyber
Security (ADCS), C-DAC, 2025

Profile Summary

- Results-oriented Cybersecurity Analyst with hands-on expertise in both Offensive (Red Team) and Defensive (Blue Team) security operations.
 - Actively sharpening skills on PortSwigger, TryHackMe, and private Capture The Flag (CTF) competitions.
 - Demonstrated proficiency in vulnerability assessment and penetration testing across web applications, APIs, and network infrastructure using industry-standard tools and frameworks.
 - Engineered a comprehensive automation framework that reduced bug bounty recon setup time by 80% through automated subdomain enumeration, port scanning, and system hardening.
 - Hands-on experience in Security Operations Center (SOC) operations, SIEM log analysis, digital forensics, incident response, and threat intelligence through intensive practical training and self-built lab environments.
- Integrate security best practices into development lifecycles, enhancing overall securityposture.

Professional Experience

- ### ISOEH, Bhubaneswar & IBM SkillBuild
- #### Cybersecurity Trainee & IBM SkillBuild Intern | Bhubaneswar, India
- Hands-on Technical Training: Practical expertise in ethical hacking and penetration testing across web, network, and mobile platforms, including security mitigation strategies.
 - SOC & Incident Response: Direct experience in Security Operations Center (SOC) workflows, digital forensics, and live incident response simulations.
 - Advanced Academic Specialization: Completed a 1.5-year Diploma in Cybersecurity, focusing on advanced offensive and defensive security disciplines.
 - IBM SkillBuild Internship: Executed threat intelligence, network defense, and vulnerability management modules within simulated enterprise environments.

- ### Bug Bounty Hunter & Security Researcher
- Responsible Disclosure (Citi Group): Professionally identified and reported critical security vulnerabilities to Citi Group via official disclosure channels.
 - Platform Security (Rocketlane): Discovered and mitigated a significant signup flow vulnerability within the Rocketlane SaaS platform.
 - Active Vulnerability Research: Engaged in ongoing research across public bug bounty programs using advanced reconnaissance and OWASP Top 10 methodologies.
 - Coordinated Reporting: Demonstrated professional communication and ethical standards in managing end-to-end vulnerability disclosure processes.

Projects

- ### Master Automation Framework — Bash, Python, Nuclei, Subfinder
- Recon Automation Framework: Integrated Linux-based tools to automate subdomain enumeration, port scanning, and system hardening, reducing setup time by 80%.
 - Environment Provisioning: Engineered automated pentest environment setup with continuous asset discovery for rapid bug bounty deployment.
 - Workflow Streamlining: Optimized the end-to-end security pipeline from initial reconnaissance to vulnerability validation, increasing overall testing coverage and efficiency.

- ### CyberRange (SIEM & SOC Lab) — VirtualBox, Splunk/ELK, Wireshark
- Architected a virtualized security operations center to simulate real-world cyber attacks including DDoS, port scanning, and malware propagation scenarios.
 - Developed hands-on proficiency in log analysis, threat detection, incident response, and security event correlation using Splunk and ELK stack.

Achievements

- CTF Champion:** Secured 1st Prize at the ISOEH Bhubaneswar CTF Hackathon in a competitive live hacking event, demonstrating advanced offensive security skills.
- Top Rankings:** Consistently ranked in the Top 2% globally on TryHackMe, solving advanced CTF challenges across offensive security learning paths.

Languages

- English, Hindi, Odia, Bengali
